

Angle Adjustable

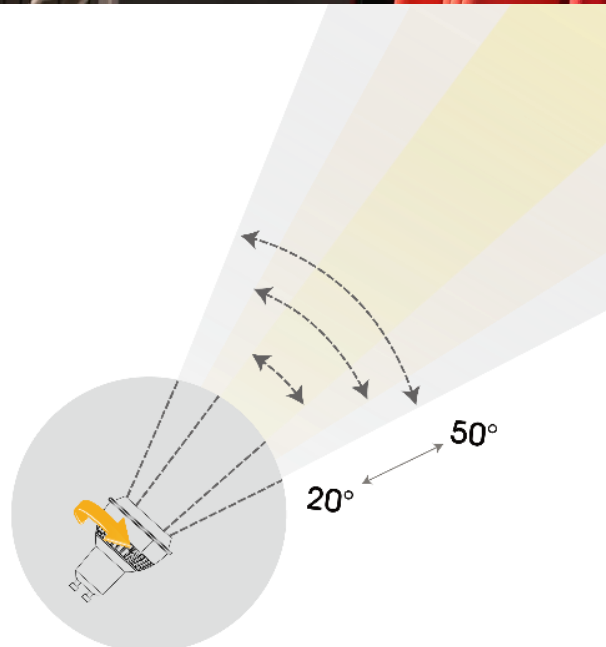

Make your store flexible by Angle Adjustable Series

For the store owner, how to design the spot light projection to inspire shoppers is quite important. However, after the demo layout changes, how to adjust the spot lights that were already fixed on the ceiling is another headache.

Usually to create the best lighting, shop owner needs to change the spot light with more suitable angles. In case of frequent changing of layouts, the spot light with multiple angles would be a better choice.

Angle Adjustable series is particular designed for this situation. It brings a lot of convenience to the shop owners who need to change their show products on the shelves by simply rotate the lens of our spot lights to reach the preferred angle.

We currently provide the most frequently used spec:
MR16, PAR16, and PAR11, and various colors are available.
